

EXPERIENCE

Sound United: Vista, CA. | 2012 - present

Senior Industrial Designer

Designing audio products for Sound United global brands: Marantz, Polk Audio, Denon, Definitive Technology, Boston Acoustics, Classe and Boom.

Responsibilities include - concept development for active projects and innovative future projects, sketches, renders, final surface CAD, collaborating with factories on design for manufacture, maintaining department project schedules, and even packaging design.

Along with daily project work, actively participating in strategic product planning with brand managers and technical category leads. Recruiting and mentor other designers, market research reports, trend forecasting, and brand identity development.

Domas Academy: Adjunct Professor | 2015 - 2016

Served as a adjunct professor, guiding students through concept development process.

Key Technologies: Baltimore, MD. | 2006 - 2012

Senior Industrial Designer

Responsible for defining and executing all aspects of the design process, from proposal to production. Served as the lead industrial designer on multidisciplinary teams made up of industrial designers, electrical, mechanical, and software engineers.

Focused on developing a rewarding user experience for complex tech products that span medical, industrial and consumer markets. Recruit and mentor junior designers. Assisted in developing in house brand language, marketing materials, and strategic company objectives.
